MULTI-SPORT ATHLETES AND MULTI-ACTIVITY PARTICIPATION

For Brookstone School to have a successful extra-curricular program, it is of utmost importance that our students participate in as many activities as possible. Therefore, whenever possible, students will be allowed to participate in more than one sport or activity during a season. For this to happen, a spirit of cooperation and shared goals must exist among members of the faculty, coaching staff, and students. Knowing that this can be a very sensitive area, the following guidelines will be in place:

1. Students who wish to participate in more than one activity during a season may apply to do so through the Athletic Department office.
2. The student must designate his/her primary and secondary activity.
3. Region and state level competition takes precedence over non-region competition and/or practice.
4. Primary sport/activity practice always takes precedence over secondary sport/activity practice unless prior approval has been granted by the primary sport/activity coach or director.
5. A student must maintain an overall “C” average or higher in their academic work to remain eligible to participate in two sports or activities during the same season.
6. The athletic director will resolve any and all conflicts regarding the sport or activity which the student-athlete participates in.

Having this opportunity can greatly enhance our school programs, as well as the high school experience for our students. Coaches and activity directors should always use good judgment and have a shared vision for school success. At all times the interest of the student should be at the forefront with regards to student participation. It should also be understood that students who are finishing one athletic season while tryouts are in progress for another season will be given special consideration and an opportunity for a delayed tryout.

At the same time, students and parents must understand that playing two sports or activities at the same time may have an impact on the student’s role on a team or in an activity. Attendance at practice and/or games is vital to the success of the team or group. Students and their parents must understand that the best interest of the team or organization should always come before the individual.
